Professional Profile

Data Quality Analyst with 6+ years of experience delivering enterprise data quality, ETL testing, data governance, and analytics solutions across banking, insurance, and technology industries. Expertise in SQL, Python, AWS Athena, Redshift, Informatica PowerCenter, and cloud-based data platforms to validate large-scale datasets, improve data reliability, and support enterprise data pipelines. Proven ability to perform end-to-end data profiling, root cause analysis, defect management, and deployment validation while collaborating with cross-functional teams to deliver high-quality, data-driven solutions. Passionate about building scalable data quality frameworks, automating validation processes, and enabling trusted business decisions.

Core Skills

- **Data Quality & Governance**

- Data Quality Management
- Data Profiling
- Data Validation
- Data Governance
- Data Lineage
- Metadata Management
- Root Cause Analysis

- **Cloud Platforms**

- AWS
- Amazon S3
- AWS Glue
- Alibaba Cloud
- DataWorks
- Informatica PowerCenter
- Cloudera

- **Data Engineering**

- ETL Testing
- ETL Validation
- Data Warehousing
- Data Pipelines
- Data Migration Testing
- Source-to-Target Validation
- Workflow Validation

- **Programming & Databases**

- SQL
- Python
- AWS Athena
- Amazon Redshift
- Hive

- **BI & Reporting**

- Tableau
- Power BI
- Dashboard Validation
- Data Reconciliation
- Data Quality Metrics

- **Testing Tools**

- JIRA
- Git
- DBeaver
- PyCharm
- Playwright

Work Experience

Ascendion

Data Analyst – Quality & Governance | Data Quality Analyst

June 2025 – Present

- Led end-to-end data quality initiatives by designing and executing validation strategies across enterprise data pipelines, APIs, databases, and reporting systems.
- Performed data profiling, ETL validation, SQL-based reconciliation, and exploratory testing to ensure data accuracy, completeness, consistency, and integrity.
- Conducted root cause analysis, defect triage, issue resolution, and impact assessment while collaborating with developers, data engineers, analysts, and business stakeholders.
- Supported production deployments, workflow validation, post-release verification, and production issue investigations to maintain reliable data pipelines.
- Produced governance reports, quality metrics, reusable validation frameworks, QA artifacts, and technical documentation supporting enterprise data quality initiatives.
- Partnered with cross-functional teams to improve data governance, testing efficiency, system reliability, and operational excellence.
- Identified process improvement opportunities through analytical and user-centric testing approaches, expanding validation coverage and reducing production risks.
- Leveraged AI tools, to accelerate SQL development, automate test case creation, improve technical documentation, and streamline data validation while ensuring accuracy and quality standards.
- Evaluated AI-generated outputs, prompt effectiveness, and testing scenarios to improve productivity while maintaining data quality and business requirements.
- **Achievements:** Successfully migrated over 3,600 tables, 18,400 workflow nodes, and 300 databases with zero major production disruptions. .

Vertere

Senior Quality Analyst S3

March 2024 – June 2025

- Designed and executed enterprise ETL testing strategies using Informatica PowerCenter and SQL validation.
- Developed Python automation scripts that streamlined regression testing and reduced manual testing effort.
- Validated data across ETL pipelines, databases, and reporting layers to ensure data quality and business rule compliance.
- Collaborated with developers and data engineers to troubleshoot defects, perform root cause analysis, and improve overall system quality.
- Enhanced testing processes through automation, workflow optimization, and Agile delivery practices.

Nityo

ETL Tester

November 2022 – February 2024

- Executed end-to-end ETL and data migration testing across enterprise data warehouse environments.
- Developed reusable test cases covering transformation logic, mapping validation, and source-to-target reconciliation.
- Performed SQL validation, defect analysis, and root cause investigations to ensure high-quality data delivery.

- Worked closely with technical and business stakeholders to validate requirements and deliver reliable data solutions.

Integrated Branding Solutions

Quality Analyst | Full Stack Web Developer

August 2019 – September 2022

- Developed and maintained content-managed websites while collaborating with cross-functional teams on project requirements and delivery timelines.
- Conducted quality assurance testing, browser compatibility testing, and performance optimization.
- Performed code reviews and debugging activities to ensure high standards of code quality and functionality.
- Applied user-focused thinking to improve usability and overall customer experience.
- Implemented automation testing using Katalon Studio to streamline testing processes and improve efficiency.
- Utilized Kanban and Scrum methodologies to facilitate efficient project management and collaboration.

Educational Background

Our Lady of Fatima University

Bachelor of Science in Information

Technology (BSIT)

2020

Professional Profile

Results-driven data professional with over 6 years of experience in Data Quality, Data Analysis, ETL Testing, and Data Engineering support across enterprise environments. Experienced in designing and executing data validation strategies, performing data profiling, ETL testing, root cause analysis, and ensuring data accuracy, integrity, and reliability throughout the data lifecycle. Proficient in SQL, Python, Informatica PowerCenter, AWS Athena, Redshift, and cloud-based data platforms, with a strong ability to optimize data pipelines and automate quality processes. Passionate about delivering scalable, high-quality data solutions that enable informed business decisions and drive operational excellence.

Career Objectives

To obtain a challenging role as a Data Quality Analyst, Data Analyst, or Data Engineer where I can leverage my expertise in data quality, ETL testing, SQL, Python, and data analysis to deliver reliable, high-quality data solutions, optimize data pipelines, and support data-driven business decisions.

Core Skills

- **Data Quality & Governance** (Data Quality Management, Data Governance, Data Profiling, Data Validation, Data Reconciliation, Data Integrity, Critical Data Elements (CDE), Metadata Management, Business Glossary, Data Lineage, Root Cause Analysis)
- **Data Engineering & ETL** (ETL Testing, ETL Validation, ETL Pipelines, Data Pipelines, Data Engineering Support, Data Warehousing, Data Migration Testing, Source-to-Target Validation, Workflow Validation, Deployment Support)
- **Data Analysis & Reporting** (Data Analysis, Exploratory Data Analysis (EDA), Data Reconciliation, Trend Analysis, Business Reporting, Data Quality Metrics, Dashboard Validation, Business Intelligence Support)
- **Programming & Querying** (SQL, Python, AWS Athena, Amazon Redshift, Hive, Database Query Optimization, Data Extraction, Data Transformation)
- **Cloud & Data Platforms** (Amazon Web Services (AWS), AWS Glue, Amazon S3, AWS Athena, Redshift, Alibaba Cloud, DataWorks, Cloudera, Informatica PowerCenter)
- **Testing & Quality Assurance** (Functional Testing, ETL Testing, Data Validation Testing, Regression Testing, System Integration Testing (SIT), User Acceptance Testing (UAT), Defect Management, Test Planning, Test Case Design, Test Execution)
- **Tools & Methodologies** (JIRA, DBeaver, PyCharm, Tableau, Git, Agile/Scrum, SDLC, Documentation, Standard Operating Procedures (SOP), Method of Procedure (MOP))
- **Collaboration & Process Improvement** (Cross-functional Collaboration, Stakeholder Management, Issue Resolution, Continuous Improvement, Process Optimization, Technical Documentation, Data Quality Monitoring)

Work Experience

Data Analyst - Quality and Governance - February 2026- Present - Ascendion

- Executed end-to-end data quality management including data profiling, DQ testing, monitoring test runs, and resolving data issues to ensure data accuracy, completeness, and consistency across enterprise

systems.

- Conducted database validation and analytical testing across enterprise datasets and reporting systems.
- Led defect lifecycle management including root cause analysis, issue escalation, resolution tracking, and collaboration with technical teams.
- Produced quality metrics, governance reports, and testing documentation to support release quality and stakeholder reporting.
- Collaborated cross-functionally with developers, analysts, and data stewards to improve system reliability and product quality.
- Utilized analytical and user-focused testing approaches to identify edge cases and process improvement opportunities.

Data Quality Analyst - June 2025 - February 2026 - Ascension

- Designed and executed ETL test plans and test cases to validate data accuracy, quality, and completeness across source systems and data warehouse layers.
- Performed API and database validation using SQL queries, data reconciliation techniques, and exploratory testing methods.
- Conducted root cause analysis for data inconsistencies and collaborated with developers to debug and resolve issues.
- Supported deployments, workflow validations, and post-release troubleshooting activities.
- Maintained reusable testing documentation, validation frameworks, and quality assurance artifacts.
- Applied analytical problem-solving and user-centric testing approaches to improve testing efficiency and coverage.

Senior Quality Analyst S3 - March 2024 - June 2025 - Vertere Global Solutions

- Developed and executed ETL testing strategies using Informatica PowerCenter and SQL validation techniques..
- Built Python automation scripts to streamline testing activities, reduce manual effort, and improve regression testing efficiency.
- Performed end-to-end validation across database, ETL, and reporting layers.
- Collaborated closely with developers and data engineers to identify, debug, and resolve defects.
- Improved testing workflows through automation enhancements and process optimization.
- Participated in Agile ceremonies and contributed to continuous quality improvement initiatives.

ETL Tester - November 2022 to February 2024 - Nityo Infotech

- Conducted end-to-end ETL and data migration testing across multiple systems and environments.
- Created comprehensive and reusable test cases covering transformation logic, data mapping, and validation scenarios.
- Performed defect tracking, root cause analysis, and issue reporting to minimize project risks and delays.
- Validated large datasets using SQL queries and data comparison techniques.
- Collaborated with stakeholders and technical teams to ensure high-quality project delivery.

Full Stack Web Developer - April 2020 to September 2022 - Integrated Branding Solutions

- Developed and maintained content-managed websites while collaborating with cross-functional teams on project requirements and delivery timelines.
- Conducted quality assurance testing, browser compatibility testing, and performance optimization.
- Performed code reviews and debugging activities to ensure high standards of code quality and functionality.
- Applied user-focused thinking to improve usability and overall customer experience.

Quality Analyst - August 2019 to April 2020 - Integrated Branding Solutions

- Implemented automation testing using Katalon Studio to streamline testing processes and improve efficiency.
- Utilized Kanban and Scrum methodologies to facilitate efficient project management and collaboration.
